

Good2BeBack

Work Re-Entry & Compliance System

Your staff, contractors, visitors, customers, patients, etc. can return to your facilities more safely and your organization can meet regulatory compliance requirements easily, with Good2BeBack.

Welcome to Good2BeBack, the one app that enables businesses and organizations of all types to easily and efficiently reunite with their workforce. All health data is consolidated for compliance with HIPAA, PHIPA, EEOC/FFCRA, Health Departments, CA SB-1159 & AB 685 and other regulatory agencies and laws.

The Good2BeBack mobile interface is simplified so that Daily Check-Ins take under 1 minute/person. Key System Administrators receive near real-time updates on the health status of everyone preparing to enter and are immediately informed if there is a health risk, enabling them to mitigate the spread of COVID-19 and other infectious diseases to come.

How does it work?

Daily Check-In Questions

Users simply check-in daily on their mobile devices and report whether or not they are symptomatic by answering customized questions provided by each company. Allow, Pause, or Deny Status is instantly shared with the individuals and their organization.

Test Results

Anyone required or allowed to submit test results can easily do so, every time they are tested. Test results matter and become an important part of each organization's "re-entry rules and protocols." Vaccine tracking coming soon!

Re-Entry Rules

Each organization customizes their acceptable requirements for daily re-entry.

Notifications

Re-entry status notifications are sent in near real-time to each individual and to specific System Administrators.

Compliance

If an organization is required to produce historical documentation of onsite workers, vendors, and/or visitors, Good2BeBack enables you to find, export and share it with regulatory agencies in just minutes.
